Skill & Expertise

Leadership - Change Management - Mentoring - AI Engineering - Data Science - Software Engineering - Digital Transformation - Business Improvement - Strategic Planning - Facilitation & Communication - Project Management - SAFE/Agile - Graphic Design - Web Development - Customer Journey - Gemini

Profile

Customer-centric leader at Airbus with a unique blend of Data Science and Community Engagement expertise. Proven track record in designing digital journeys and building high-impact communication platforms (Airbus Young Voices). Seeking to leverage technical innovation and customer-centric design

I have been living, studying and working in 4 different countries and therefore got a passion for working in multicultural environments.

Professional Experience

March 2022 to NOW

**DATA SCIENCE & DIGITALIZATION | Quality ENGINEERING Q1A
AIRBUS OPERATIONS GmbH | HAMBURG, GERMANY**

- Designing and launching end-to-end digital journeys and automation pipelines that optimize the "Quality Engineering" user experience and improve process efficiency.
- Leading a global community of digital ambassadors, facilitating engagement events and workshops to drive cross-functional collaboration and "Voice of the Customer" feedback loops.
- Establishing 5 collaboration platforms to ensure agility and optimize results delivery for a team of +10 members
- Helping the Q1A management board design the Digitalization Roadmap with a focus on implementing state-of-the-art tech [Data Analytics, Artificial Intelligence, Process Automation...etc.]
- Working with the Airbus German Board of Management to improve their social media presence and motivate the future generations to start a career in aerospace

August 2019 to March 2022

**Digital Transformation & Data Science | Airframe Engineering 1A
AIRBUS OPERATIONS GmbH | HAMBURG, GERMANY**

- *Unleashing the potential of data: being able to take advantage of the enormous possibilities of the data platform "Skywise" and to helping to shape its success*
- *Leading Process Improvement & product development projects for complex fuselage issues w/ focus on digital technologies*
- Collaborating to realize product requirements w/ analysis & technical assessment, proof of concepts, specification and innovative ideas
- Aligning integrated solutions and optimized future work practices as an essential member of an MFT

- Collaborating w/ other Airbus sites and worldwide external partners and suppliers for engineering services and fuselage use cases

April 2018 to August 2019

**Software Engineering Intern - Consultant
Swisstraffic AG | Bern, Switzerland**

- Implementing, supporting and integrating different software applications
- Gathering, analyzing client requirements and monitoring the development cycle to ensure quality and on-time development
- Database development and management (MySQL & PostgreSQL)
- Determining Operational feasibility by evaluating analysis, problem definition, requirements, solution development and proposed solutions

Education

October 2017 to October 2018

**Masters Degree in Computer Sciences - Big Data
ISAE-ENSMA | Poitiers, France**

Software development, Embedded systems, real time programming, Human/Machine interaction, Machine learning

September 2012 to October 2017

**Masters Degree in Telecommunications
University of Tlemcen | Tlemcen, Algeria**

Master's degree student in telecommunications with a minor in Networks & Mobile Telecommunications Services.
